

HOW TO CARE FOR YOUR FR

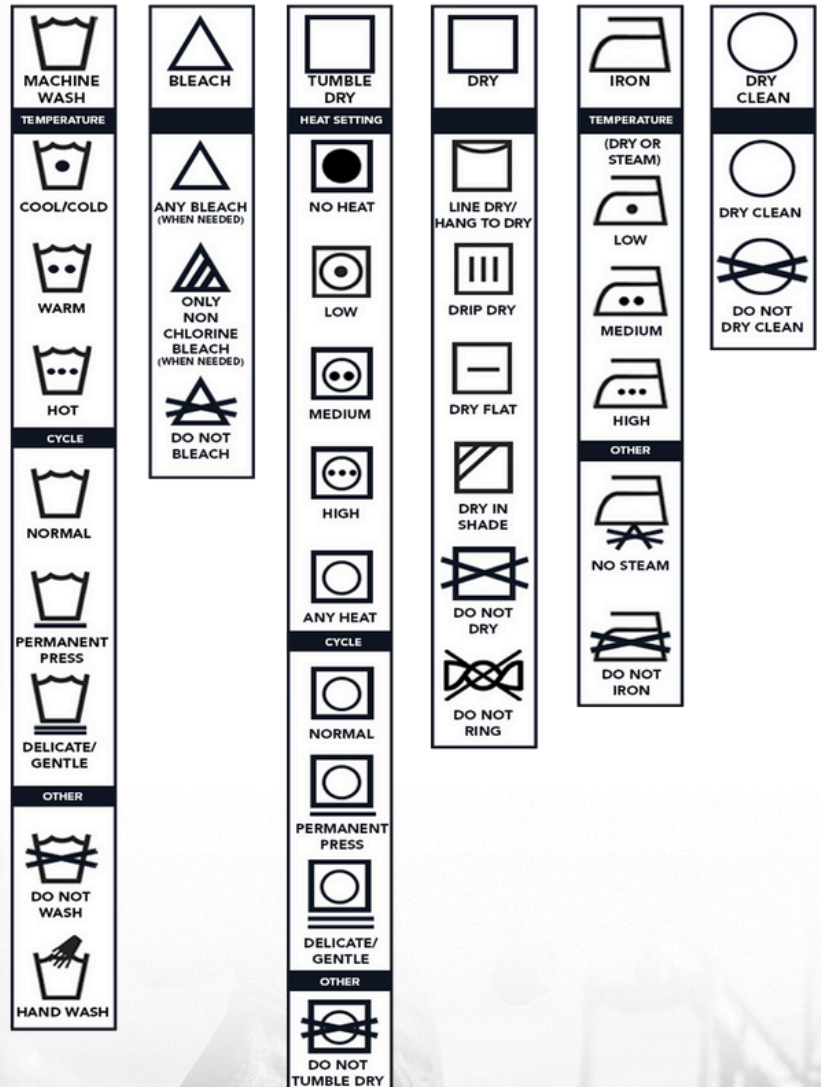

DO

- ✓ Wash FR clothing *separately* from non-FR clothing
- ✓ Use mild, synthetic detergents
- ✓ Use recommended maximum water temp– (warm water, 140°F/60°C or as specified on care tag)
- ✓ Hang dry or tumble dry on low heat
- ✓ Inspect garment after washing for remaining odors or stains– flammable soils could compromise FR characteristics
- ✓ If heavily soiled, rewash instead of wearing compromised garments

DON'T

- ✗ Avoid natural soaps and detergents that contain animal fats
- ✗ Don't use bleach, hydrogen peroxide (*OxyClean*), fabric softener or starch
- ✗ Avoid extremely hot water, which could degrade the garment
- ✗ Never spray garment with insect repellent
- ✗ Avoid storing your FR gear near flammable materials or in areas with high heat or direct sunlight

GARMENT CARE TAG SYMBOLS

ALWAYS CHECK FOR SIGNS OF WEAR
SUCH AS FRAYING, HOLES OR BROKEN CLOSURES, AND REPLACE GARMENTS THAT NO LONGER MEET SAFETY STANDARDS.
